Chalk Pencil
Sew-on Magnetic Snap, for purses

Get Started- Please read through all instructions before beginning any project.

- 1) Trace and label all shapes onto your fusible. Don't worry, all shapes have been reversed.
- 2) Cut out all shapes, leaving 1/8"-1/4" around each piece.
- 3) Fuse each shape to the appropriate wools. Please refer to the pressing instructions for your fusible. Do not over press!
- 4) Cut out all shapes on the lines.
- 5) Only fuse one wool element at a time, stitch around and add all details before moving onto the next. Refer to photos and the stitch table for all the details and placement. This prevents any pieces from popping off during the stitching process. Because the bag is so thick, I was able to place my hand inside for stability while pressing the pieces in place and not get burned. Be careful to not press too hard or too long, there is plastic in this felt and it will melt. Trust me! LOL!!! Don't worry, it will fuse with light, repeated pressure.
- Again, because the felt is so thick, you will only need to catch the top of the felt to secure your stitches. You do not need to stitch all of the way thru the felt.
- 7) With a chalk pencil, draw the additional accent stitching and stitch according to the table.

9) Stitch one side of your purse magnet, 1/2" down from top curve of your plaid wool flap.

10) Fuse the wool flap onto the inside of the bag flap, lining up the curved edges. With H207 doubled, blanket stitch around the outside curved edge of the flap. Once you get to the straight edge on the bottom, blanket stitch this in place with a single thread of H207. Do not stitch through the entire flap, your stitches will show on the front.

11) Fold the flap in place under the leather strap. Mark where you need to place the other side of your purse magnet. Attach by stitching in place.

12) Enjoy this piece as a fun purse or a small needle, project case.
